Projects

Token Tracker

Made a web3 project using angular with typescript intergrated Coinecko API to track live Data for crypto currency tokens.

Nero V2

Build an Angular project with a user friendly user interface it is a webapp for a trading "startup" where the user ca login and check live markets and buy crypto currency and nfts or choose any learning content from the available courses

Easy Shop

An Online E commece shop that lets you buy food and clothes and get them delivered t you from the comfort of your own home with a click of a button i used Angular for this application

Task Manager

A React Application That lets you track your tasks during the day this was a very challenging as i was trying to learn more about state management but it was all worth it
